Where would you like to live in the future, and who would you like to live with (on your own, with friends, with family, or with support)?

What kind of job or career do you hope to have, and what skills do you think you'll need to get there?

Do you want to learn to drive or use other forms of transport, and how do you imagine getting around independently as an adult?

What are your hopes for your future family life—such as friendships, relationships, or pets you'd like to have?

What goals are most important to you for adult life (e.g., managing money, cooking, having a routine, staying healthy), and how do you want to work towards them?
